

# Setting the times your SMS messages are sent to guests

To avoid your guests receiving SMS in the middle of the night and potentially alarming them needlessly, schedule the times between which your SMS notifications will be sent.

1. Go to **Admin > SMS settings**.
2. Tick the box in front of **Turn on custom times** and enter the time period you want to sent SMS in.

The screenshot shows a settings box with the text "Send sms between these times:". To the right of this text is a checkbox labeled "Turn on custom times" which is checked. Further right is the word "From" followed by a time selection dropdown menu currently showing "09:00". To the right of this is the word "To" followed by another time selection dropdown menu currently showing "16:59".

3. Click Save.
