

Price seasons : How do I set up and use price seasons?

Price seasons allows you to copy specific date periods and prices to specific properties. For example, if you have multiple properties with the same prices, you can easily increase rates across all of these properties in these simple steps.

It is only advisable to use this method of adding pricing if you have several properties which share exactly the same pricing.

1. Go to *Properties > Price Seasons*.
2. Enter a pricing group name eg. *High season prices*.
3. Select if you wish to also include short break prices and click Save.

Add new group

Pricing group name:	High season prices
Pricing model:	-- Select pricing model --
	-- Select pricing model -- Don't allow short breaks Allow short breaks

4. Add season name e.g. "June - August" and enter in the prices for that that period.
5. Click Add season.

High season prices [Allow short breaks]

Season name	Weekly price	1 night mid-week	2 night mid-week	3 night mid-week	4 night mid-week	1 night weekend	2 night weekend	3 night weekend	4 night weekend	5 nights	6 nights	Edit group	Delete group
June-August	1000	200	400	500	600	250	450	650	850	900	1000	→	Add season

6. Select your start and end date for this period e.g. 30th June > 31st August.
7. Click Add date range. You then have the opportunity to add additional date ranges e.g. Christmas and New Year.

Season name	Weekly price	1 night mid-week	2 night mid-week	3 night mid-week	4 night mid-week	1 night weekend	2 night weekend	3 night weekend	4 night weekend	5 nights	6 nights	Edit group	Delete group
June-August	1000	200	400	500	600	250	450	650	850	900	1000	Save	Delete
Start date:	2018-06-30	End date:	2018-08-31									→	Add date range

Start date:	2018-06-30	End date:	2018-08-31	Save	Delete
Start date:		End date:		Add date range	

8. To set these prices against multiple properties select Copy to and select your parameters.

Apply prices for the season: High season prices

Copy to: Individual properties ▾

-- Select --
